Cognitive Radio Communications and Networks: Principles and Practice

Cognitive Radio Communications and Networks: Principles and Practice

This book gives comprehensive and balanced coverage of the principles of cognitive radio communications, cognitive networks, and details of their implementation, including the latest developments in the standards and spectrum policy. Case studies, end-of-chapter questions, and descriptions of various platforms and test beds, together with sample code, give hands-on knowledge of how cognitive radio systems can be implemented in practice. Extensive treatment is given to several standards, including IEEE 802.22 for TV White Spaces and IEEE SCC41.

Written by leading people in the field, both at universities and major industrial research laboratories, this tutorial text gives communications engineers, R&D engineers, researchers, undergraduate and post graduate students a complete reference on the application of wireless communications and network theory for the design and implementation of cognitive radio systems and networks.

- Each chapter is written by internationally renowned experts, giving complete and balanced treatment of the fundamentals of both cognitive radio communications and cognitive networks, together with implementation details
- Extensive treatment of the latest standards and spectrum policy developments enables the development of compliant cognitive systems
- Strong practical orientation - through case studies and descriptions of cognitive radio platforms and testbeds - shows how "real world" cognitive radio systems and network architectures have been built
- Additional materials, slides, solutions to end-of-chapter problems, and sample codes, are available at www.elsevierdirect.com/companions

Alexander M. Wyglinski is an Assistant Professor of Electrical and Computer Engineering at Worcester Polytechnic Institute (WPI), Director of the WPI Limerick Project Center, and Director of the Wireless Innovation Laboratory (WI Lab).

Maziar Nekovee leads cognitive radio research at BT (British Telecom) and is also involved in leading a number of large EU and International collaborative R&D projects on cognitive radio networks and secondary/dynamic spectrum access.

Y. Thomas Hou is an Associate Professor of Electrical and Computer Engineering at Virginia Polytechnic Institute and State University ("Virginia Tech"), Blacksburg, VA, USA.

- Each chapter is written by internationally renowned experts, giving complete and balanced treatment of the fundamentals of both cognitive radio communications and cognitive networks, together with implementation details
- Extensive treatment of the latest standards and spectrum policy developments enables the development of compliant cognitive systems
- Strong practical orientation - through case studies and descriptions of cognitive radio platforms and testbeds - shows how "real world" cognitive radio systems and network architectures have been built

From reader reviews:

Ruth Brinkman:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each reserve has different aim or goal; it means that reserve has different type. Some people feel enjoy to spend their time to read a book. They may be reading whatever they acquire because their hobby is actually reading a book. Think about the person who don't like looking at a book? Sometime, man feel need book if they found difficult problem as well as exercise. Well, probably you will need this Cognitive Radio Communications and Networks: Principles and Practice.

Ellen Kelsey:

Do you certainly one of people who can't read enjoyable if the sentence chained in the straightway, hold on guys this particular aren't like that. This Cognitive Radio Communications and Networks: Principles and Practice book is readable simply by you who hate the perfect word style. You will find the data here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to deliver to you. The writer connected with Cognitive Radio Communications and Networks: Principles and Practice content conveys thinking easily to understand by a lot of people. The printed and e-book are not different in the written content but it just different such as it. So , do you nonetheless thinking Cognitive Radio Communications and Networks: Principles and Practice is not loveable to be your top listing reading book?

John Yates:

Reading can called mind hangout, why? Because when you are reading a book especially book entitled Cognitive Radio Communications and Networks: Principles and Practice your thoughts will drift away trough every dimension, wandering in every single aspect that maybe mysterious for but surely can be your mind friends. Imaging every single word written in a guide then become one form conclusion and explanation that will maybe you never get prior to. The Cognitive Radio Communications and Networks: Principles and Practice giving you one more experience more than blown away your thoughts but also giving you useful details for your better life in this era. So now let us teach you the relaxing pattern at this point is your body and mind is going to be pleased when you are finished reading through it, like winning a game. Do you want to try this extraordinary spending spare time activity?

Jean Taylor:

Are you kind of busy person, only have 10 or even 15 minute in your morning to upgrading your mind talent or thinking skill also analytical thinking? Then you are experiencing problem with the book than can satisfy your short time to read it because this time you only find e-book that need more time to be study. Cognitive Radio Communications and Networks: Principles and Practice can be your answer as it can be read by you actually who have those short time problems.
