This guide covers the Greater Antilles, which comprises five groups of islands and six countries. From Cuba, with about 360 species, to the Cayman Islands with just over 220 species, the Greater Antilles have recorded just over 550 species and this total contains more than 100 single island endemics and many more restricted range species making these islands a very attractive proposition to the visiting birder. The site accounts have details of location, birding strategy, accommodation and, of course, the birds. More than 80 sites are detailed, many with accompanying maps. A full species lists shows exactly what has been seen in each country, and the selective list helps to target the best places to visit. As well as covering the very best birding sites, the authors have also tried to include some locations close to main holiday centres used by birders with families.
