INTRODUCTION TO MICROPROCESSORS A P Godse, D A Godse

Digital Computer and Microprocessor : Digital Computers : General architecture and brief description of elements, Instruction execution, Instruction format, And instruction set, Addressing modes, Programming system, Higher level languages. Buses and CPU Timings : Bus size and signals, Machine cycle timing diagram, Instruction timing, Processor timing. Microprocessor and Microprocessor Development Systems: Evolution of microprocessor, Microprocessor architecture and its operations, Memory, Inputs-outputs (I/Os), Data transfer schemes interfacing devices, Architecture advancements of microprocessors, Typical microprocessor development system. 8-bit Microprocessors: 8085 microprocessor : Pin configuration, Internal architecture. Timing and signals: Control and status, Interrupt: ALU, Machine cycles. Instruction Set of 8085 : Addressing Modes : Register addressing, Direct addressing; Register indirect addressing, Immediate addressing, And implicit addressing. Instruction format, Op-codes, Mnemonics, No. of bytes, RTL, Variants, No. of machine cycles and T states, Addressing modes. Instruction Classification : Data transfer, Arithmetic operations, Logical operations, Branching operation, Machine control; Writing assembly language programs, Assembler directives. 16-bit Microprocessors: Architecture : Architecture of INTEL 8086 (Bus interface unit, Execution unit), Register organization, Memory addressing, Memory segmentation, Operating modes. Instruction Set of 8086 : Addressing modes : Instruction format : Discussion on instruction set: Groups: Data transfer, Arithmetic , Logic string, Branch control transfer, Processor control. Interrupts : Hardware and software interrupts, Responses and types. Fundamental of Programming : Development of algorithms, Flowcharts in terms of structures, (series, parallel, if-then-else etc.) Assembler Level Programming : Memory space allocation (mother board and user program) Assembler level programs (ASMs). Peripheral Interfacing: I/O programming: Programmed I/O, Interrupt driven I/O, DMA I/O interface: serial and parallel communication, Memory I/O mapped I/Os. Peripheral Devices: 8237 DMA controller, 8255-Programmable peripheral interface, 8253/8254 Programmable timer/counter. 8259 Programmable interrupt controller.

From reader reviews:

Willie Clark:

Have you spare time for any day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent their own spare time to take a stroll, shopping, or went to typically the Mall. How about open as well as read a book called INTRODUCTION TO MICROPROCESSORS? Maybe it is being best activity for you. You recognize beside you can spend your time using your favorite's book, you can more intelligent than before. Do you agree with it is opinion or you have some other opinion?

Jackie Sneller:

People live in this new day of lifestyle always attempt to and must have the free time or they will get great deal of stress from both everyday life and work. So , if we ask do people have extra time, we will say absolutely of course. People is human not only a robot. Then we question again, what kind of activity are you experiencing when the spare time coming to you actually of course your answer can unlimited right. Then do you ever try this one, reading publications. It can be your alternative in spending your spare time, the book you have read is usually INTRODUCTION TO MICROPROCESSORS.

Johnny Ballance:

As we know that book is essential thing to add our information for everything. By a e-book we can know everything we wish. A book is a set of written, printed, illustrated or perhaps blank sheet. Every year was exactly added. This publication INTRODUCTION TO MICROPROCESSORS was filled concerning science. Spend your time to add your knowledge about your technology competence. Some people has diverse feel when they reading some sort of book. If you know how big advantage of a book, you can really feel enjoy to read a reserve. In the modern era like now, many ways to get book that you simply wanted.

Steven Burley:

That reserve can make you to feel relax. This particular book INTRODUCTION TO MICROPROCESSORS was bright colored and of course has pictures on the website. As we know that book INTRODUCTION TO MICROPROCESSORS has many kinds or variety. Start from kids until adolescents. For example Naruto or Private eye Conan you can read and believe you are the character on there. Therefore , not at all of book usually are make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading in which.
