Operating Systems Concepts with Linux and POSIX Threads

Robert P. Cook

Operating Systems Concepts with Linux and POSIX Threads Robert P. Cook

An operating system text that uses Linux and POSIX Threads to illustrate concepts. Topics include shell programming, concurrent programming, scheduling, file systems, resource management, the world-wide web, I/O programming, protection and store management. All examples execute in Linux as well as Apple OS/X.

8/14 Added free online lectures to accompany the text at professor cook dot org.

The author has thirty years experience in systems software. He has taught operating systems and distributed computing at Vanderbilt, Florida, Wisconsin, Virginia, Mississippi, and Georgia Southern. Cook has worked at Microsoft in the position of Software Architect, Sun Microsystems and NASA and has consulted world-wide.
