The President as Soldier: George Washington and the Whiskey Rebellion Mark Simpson

George Washington was forced to conduct a delicate balancing act when the Whiskey Rebellion erupted in rural Pennsylvania in 1791. He had to enforce the laws of the new federal government under the Constitution, without appearing to act as a tyrant. This investigation reveals that George Washington's actions during the Whiskey Rebellion were the work of a master politician. President Washington prevented anarchy from spreading beyond a small band of rural residents, who were accustomed to protesting against government authority, without utilizing significant military force. He did this while stopping individuals within the young national government from threatening democracy, by exceeding federal authority in their efforts to put down the rebellion. As part of this effort, President Washington made the surprising decision to lead troops into the field one last time.
