This book also helps Risk Management Plan (RMP) facilities successfully meet the new Federal requirements for public disclosure of RMP offsite consequence analysis results and provides techniques for communicating effectively during environmental emergencies.

Written in a straight-forward, no-nonsense style the book presents concise informative chapters, flow diagrams, checklists, and a thorough index. The authors present step-by-step instruction on developing a principled plan of action that generates open communications. CEOs, Corporate Communications Specialists, Plant Managers, Environmental Compliance Supervisors, Health and Safety Officers, Environmental Scientists and Engineers, and Consultants will benefit from Environmental Risk Communication.
