## Green Techniques for Organic Synthesis and Medicinal Chemistry

Green chemistry is a new way of looking at organic synthesis and the design of drug molecules, offering important environmental and economic advantages over traditional synthetic processes. Pharmaceutical companies are increasingly turning to the principles of green chemistry in an effort to reduce waste, reduce costs and develop environmentally benign processes.

*Green Techniques for Organic Synthesis and Medicinal Chemistry* presents an overview of the established and emerging techniques in green organic chemistry, highlighting their applications in medicinal chemistry. The book is divided into four parts:

**Introduction:** Introduces the reader to the toxicology of organic chemicals, their environmental impact, and the concept of green chemistry.

**Green Catalysis:** Covers a variety of green catalytic techniques including organocatalysis, supported catalysis, biocatalysis, fluorine catalysis, and catalytic direct C-H bond activation reactions.

**Green Synthetic Techniques:** Presents a series of new techniques, assessing the green chemistry aspects and limitations (i.e. cost, equipment, expertise). Techniques include reactions in alternative solvents, atom economic multicomponent reactions, microwave and ultrasonic reactions, solid-supported synthesis, fluorine and ionic liquid-based recycling techniques, and flow reactors.

**Green Techniques in Pharmaceutical Industry:** Covers applications of green chemistry concepts and special techniques for medicinal chemistry, including synthesis, analysis, separation, formulation, and drug delivery. Process and business case studies are included to illustrate the applications in the pharmaceutical industry.

*Green Techniques for Organic Synthesis and Medicinal Chemistry* is an essential resource on green chemistry technologies for academic researchers, R&D professionals and students working in organic chemistry and medicinal chemistry.

### From reader reviews:

#### **Thomas West:**

Book is to be different per grade. Book for children till adult are different content. As we know that book is very important normally. The book Green Techniques for Organic Synthesis and Medicinal Chemistry seemed to be making you to know about other expertise and of course you can take more information. It is quite advantages for you. The book Green Techniques for Organic Synthesis and Medicinal Chemistry is not only giving you more new information but also for being your friend when you sense bored. You can spend your own personal spend time to read your e-book. Try to make relationship with the book Green Techniques for Organic Synthesis and Medicinal Chemistry. You never feel lose out for everything when you read some books.

#### **Shirley Akins:**

In this 21st hundred years, people become competitive in every single way. By being competitive currently, people have do something to make them survives, being in the middle of the actual crowded place and notice by simply surrounding. One thing that sometimes many people have underestimated that for a while is reading. Yes, by reading a book your ability to survive enhance then having chance to remain than other is high. For you personally who want to start reading the book, we give you this kind of Green Techniques for Organic Synthesis and Medicinal Chemistry book as basic and daily reading guide. Why, because this book is more than just a book.

#### **Byron Hiebert:**

Do you one of people who can't read gratifying if the sentence chained inside straightway, hold on guys that aren't like that. This Green Techniques for Organic Synthesis and Medicinal Chemistry book is readable by you who hate the perfect word style. You will find the details here are arrange for enjoyable studying experience without leaving actually decrease the knowledge that want to supply to you. The writer of Green Techniques for Organic Synthesis and Medicinal Chemistry content conveys the thought easily to understand by most people. The printed and e-book are not different in the articles but it just different available as it. So , do you still thinking Green Techniques for Organic Synthesis and Medicinal Chemistry is not loveable to be your top checklist reading book?

#### **Katrice Fredericksen:**

Spent a free time for you to be fun activity to do! A lot of people spent their down time with their family, or their particular friends. Usually they carrying out activity like watching television, gonna beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your own personal free time/ holiday? Might be reading a book is usually option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to test look for book, may be the guide untitled Green Techniques for Organic Synthesis and Medicinal Chemistry can be great book to read. May be it might be best activity to you.
