Lifelong Learning and the Learning Society Complete Trilogy Set: Globalization, Lifelong Learning and the Learning Society: Sociological Perspectives (Volume 2) Peter Jarvis

This book critically assesses the learning that is required and provided within a learning society and gives a detailed sociological analysis of the emerging role of lifelong learning with examples from around the globe. Divided into three clear parts the book:

- looks at the development of the knowledge economy
- provides a critique of lifelong learning and the learning society
- focuses on the changing nature of research in the learning society.

The author, well-known and highly respected in this field, examines how lifelong learning and the learning society have become social phenomena across the globe. He argues that the driving forces of globalisation are radically changing lifelong learning and shows that adult education/learning only gained mainstream status because of these global changes and as learning became more work orientated.
