Mathematics of Harmony (Series on Knots and Everything) (Series in Knots and Everything) Alexey Stakhov

This volume is a result of the author's four decades of research in the field of Fibonacci numbers and the Golden Section and their applications. It provides a broad introduction to the fascinating and beautiful subject of the "Mathematics of Harmony," a new interdisciplinary direction of modern science. This direction has its origins in "The Elements" of Euclid and has many unexpected applications in contemporary mathematics (a new approach to a history of mathematics, the generalized Fibonacci numbers and the generalized golden proportions, the "golden" algebraic equations, the generalized Binet formulas, Fibonacci and "golden" matrices), theoretical physics (new hyperbolic models of Nature) and computer science (algorithmic measurement theory, number systems with irrational radices, Fibonacci computers, ternary mirror-symmetrical arithmetic, a new theory of coding and cryptography based on the Fibonacci and "golden" matrices). The book is intended for a wide audience including mathematics teachers of high schools, students of colleges and universities and scientists in the field of mathematics, theoretical physics and computer science. The book may be used as an advanced textbook by graduate students and even ambitious undergraduates in mathematics and computer science.

From reader reviews:

Robert Stratton:

Reading can called head hangout, why? Because when you find yourself reading a book mainly book entitled Mathematics of Harmony (Series on Knots and Everything) (Series in Knots and Everything) your thoughts will drift away trough every dimension, wandering in each aspect that maybe unknown for but surely can become your mind friends. Imaging each and every word written in a e-book then become one application form conclusion and explanation that will maybe you never get just before. The Mathematics of Harmony (Series on Knots and Everything) (Series in Knots and Everything) giving you a different experience more than blown away the mind but also giving you useful facts for your better life in this particular era. So now let us show you the relaxing pattern is your body and mind will be pleased when you are finished reading it, like winning a sport. Do you want to try this extraordinary spending spare time activity?

Sophia Whitfield:

Beside this kind of Mathematics of Harmony (Series on Knots and Everything) (Series in Knots and Everything) in your phone, it can give you a way to get closer to the new knowledge or data. The information and the knowledge you will got here is fresh from your oven so don't end up being worry if you feel like an aged people live in narrow village. It is good thing to have Mathematics of Harmony (Series on Knots and Everything) (Series in Knots and Everything) because this book offers to your account readable information. Do you at times have book but you seldom get what it's all about. Oh come on, that won't happen if you have this within your hand. The Enjoyable blend here cannot be questionable, including treasuring beautiful island. So do you still want to miss the idea? Find this book along with read it from today!

Eddie Horton:

Is it an individual who having spare time in that case spend it whole day by means of watching television programs or just lying down on the bed? Do you need something totally new? This Mathematics of Harmony (Series on Knots and Everything) (Series in Knots and Everything) can be the response, oh how comes? A book you know. You are therefore out of date, spending your spare time by reading in this brand new era is common not a nerd activity. So what these guides have than the others?

Ruth Snider:

A lot of people said that they feel uninterested when they reading a publication. They are directly felt it when they get a half regions of the book. You can choose the actual book Mathematics of Harmony (Series on Knots and Everything) (Series in Knots and Everything) to make your personal reading is interesting. Your own skill of reading expertise is developing when you such as reading. Try to choose simple book to make you enjoy you just read it and mingle the impression about book and looking at especially. It is to be initially opinion for you to like to start a book and learn it. Beside that the book Mathematics of Harmony (Series on

Knots and Everything) (Series in Knots and Everything) can to be your brand-new friend when you're sense alone and confuse in doing what must you're doing of the time.
