Multiple Criteria Decision Making by Multiobjective Optimization: A Toolbox (International Series in Operations Research & Management Science) Ignacy Kaliszewski, Janusz Miroforidis, Dmitriy Podkopaev

This textbook approaches optimization from a multi-aspect, multi-criteria perspective. By using a Multiple Criteria Decision Making (MCDM) approach, it avoids the limits and oversimplifications that can come with optimization models with one criterion. The book is presented in a concise form, addressing how to solve decision problems in sequences of intelligence, modelling, choice and review phases, often iterated, to identify the most preferred decision variant. The approach taken is human-centric, with the user taking the final decision is a sole and sovereign actor in the decision making process. To ensure generality, no assumption about the Decision Maker preferences or behavior is made. The presentation of these concepts is illustrated by numerous examples, figures, and problems to be solved with the help of downloadable spreadsheets. This electronic companion contains models of problems to be solved built in Excel spreadsheet files.

Optimization models are too often oversimplifications of decision problems met in practice. For instance, modeling company performance by an optimization model in which the criterion function is short-term profit to be maximized, does not fully reflect the essence of business management. The company's managing staff is accountable not only for operational decisions, but also for actions which shall result in the company ability to generate a decent profit in the future. This calls for management decisions and actions which ensure short-term profitability, but also maintaining long-term relations with clients, introducing innovative products, financing long-term investments, etc. Each of those additional, though indispensable actions and their effects can be modeled separately, case by case, by an optimization model with a criterion function adequately selected. However, in each case the same set of constraints represents the range of company admissible actions. The aim and the scope of this textbook is to present methodologies and methods enabling modeling of such actions **jointly**.

From reader reviews:

Robert Hester:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each publication has different aim or perhaps goal; it means that guide has different type. Some people experience enjoy to spend their a chance to read a book. They may be reading whatever they take because their hobby is definitely reading a book. What about the person who don't like reading through a book? Sometime, man or woman feel need book when they found difficult problem or perhaps exercise. Well, probably you should have this Multiple Criteria Decision Making by Multiobjective Optimization: A Toolbox (International Series in Operations Research & Management Science).

William Prentice:

Nowadays reading books are more than want or need but also turn into a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The knowledge you get based on what kind of reserve you read, if you want send more knowledge just go with education books but if you want sense happy read one using theme for entertaining including comic or novel. The actual Multiple Criteria Decision Making by Multiobjective Optimization: A Toolbox (International Series in Operations Research & Management Science) is kind of book which is giving the reader unpredictable experience.

Donald Diaz:

This book untitled Multiple Criteria Decision Making by Multiobjective Optimization: A Toolbox (International Series in Operations Research & Management Science) to be one of several books this best seller in this year, here is because when you read this book you can get a lot of benefit in it. You will easily to buy this kind of book in the book retail outlet or you can order it by using online. The publisher with this book sells the e-book too. It makes you more readily to read this book, as you can read this book in your Mobile phone. So there is no reason to you to past this reserve from your list.

Cynthia Olson:

People live in this new day of lifestyle always make an effort to and must have the free time or they will get great deal of stress from both way of life and work. So , when we ask do people have spare time, we will say absolutely sure. People is human not really a robot. Then we question again, what kind of activity have you got when the spare time coming to you actually of course your answer will certainly unlimited right. Then do you try this one, reading books. It can be your alternative inside spending your spare time, the particular book you have read is definitely Multiple Criteria Decision Making by Multiobjective Optimization: A Toolbox (International Series in Operations Research & Management Science).
