101 Quantum Questions: What You Need to Know About the World You Can't See Kenneth W. Ford

Ken Ford's mission is to help us understand the "great ideas" of quantum physics—ideas such as wave-particle duality, the uncertainty principle, superposition, and conservation. These fundamental concepts provide the structure for *101 Quantum Questions*, an authoritative yet engaging book for the general reader in which every question and answer brings out one or more basic features of the mysterious world of the quantum—the physics of the very small.

Nuclear researcher and master teacher, Ford covers everything from quarks, quantum jumps, and what causes stars to shine, to practical applications ranging from lasers and superconductors to light-emitting diodes. Ford's lively answers are enriched by Paul Hewitt's drawings, numerous photos of physicists, and anecdotes, many from Ford's own experience. Organized for cover-to-cover reading, *101 Quantum Questions* also is great for browsing.

Some books focus on a single subject such as the standard model of particles, or string theory, or fusion energy. This book touches all those topics and more, showing us that disparate natural phenomena, as well as a host of manmade inventions, can be understood in terms of a few key ideas. Yet Ford does not give us simplistic explanations. He assumes a serious reader wanting to gain real understanding of the essentials of quantum physics.

Ken Ford's other books include *The Quantum World: Quantum Physics for Everyone* (Harvard 2004), which *Esquire* magazine recommended as the best way to gain an understanding of quantum physics. Ford's new book, a sequel to the earlier one, makes the quantum world even more accessible.

From reader reviews:

Kevin Santiago:

The event that you get from 101 Quantum Questions: What You Need to Know About the World You Can't See is a more deep you excavating the information that hide within the words the more you get serious about reading it. It does not mean that this book is hard to be aware of but 101 Quantum Questions: What You Need to Know About the World You Can't See giving you joy feeling of reading. The writer conveys their point in certain way that can be understood by means of anyone who read that because the author of this guide is well-known enough. This specific book also makes your vocabulary increase well. That makes it easy to understand then can go together with you, both in printed or e-book style are available. We suggest you for having this kind of 101 Quantum Questions: What You Need to Know About the World You Can't See instantly.

April Hall:

Many people spending their time frame by playing outside along with friends, fun activity having family or just watching TV 24 hours a day. You can have new activity to invest your whole day by reading a book. Ugh, do you consider reading a book can actually hard because you have to take the book everywhere? It alright you can have the e-book, having everywhere you want in your Touch screen phone. Like 101 Quantum Questions: What You Need to Know About the World You Can't See which is having the e-book version. So , why not try out this book? Let's see.

Denise Niemi:

This 101 Quantum Questions: What You Need to Know About the World You Can't See is brand-new way for you who has intense curiosity to look for some information because it relief your hunger details. Getting deeper you upon it getting knowledge more you know otherwise you who still having small amount of digest in reading this 101 Quantum Questions: What You Need to Know About the World You Can't See can be the light food for you personally because the information inside this particular book is easy to get through anyone. These books produce itself in the form which is reachable by anyone, yes I mean in the e-book type. People who think that in guide form make them feel sleepy even dizzy this e-book is the answer. So there isn't any in reading a guide especially this one. You can find actually looking for. It should be here for an individual. So , don't miss the idea! Just read this e-book type for your better life along with knowledge.

Donna Hubbard:
