Millennium Star Atlas: An All-Sky Atlas Comprising One Million Stars to Visual Magnitude Eleven from the Hipparcos and Tycho Catalogues and Ten Thousand Nonstellar Objects Roger W. Sinnott, Michael A. C. Perryman

This is a description from Wikipedia: The Millennium Star Atlas was constructed as a collaboration between a team at Sky & Telescope led by Roger Sinnott, and the European Space Agency's Hipparcos project, led by Michael Perryman. It was the first sky atlas to include the Hipparcos and Tycho Catalogue data, extending earlier undertakings in terms of completeness and uniformity to a magnitude limit of around 10-11 magnitude. It appeared as a stand-alone publication,[1] and as three volumes of the 17-volume Hipparcos Catalogue. The 1548 charts include one million stars from the Hipparcos and Tycho-1 Catalogues, three times as many as in any previous all-sky atlas; more than 8000 galaxies with their orientation; outlines of many bright and dark nebulae; the location of many open and globular clusters; and some 250 of the brightest quasars. The non-stellar objects in the atlas are identified by type and designation. The chart scale is 100 arcsec/mm, matching that at the focus of an 8-inch f/10 Schmidt-Cassegrain. Star magnitudes are essentially Johnson V. Distance labels are given for stars within 200 light-years of the Sun. Proper motion arrows are given for stars with motions exceeding 0.2 arcsec/yr. Variable stars are indicated by amplitude and variability type. Many thousands of already known and newly discovered double stars are depicted with tick marks indicating separation and position angle.

From reader reviews:

Keith McLeod:

This Millennium Star Atlas: An All-Sky Atlas Comprising One Million Stars to Visual Magnitude Eleven from the Hipparcos and Tycho Catalogues and Ten Thousand Nonstellar Objects book is not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is usually information inside this guide incredible fresh, you will get info which is getting deeper a person read a lot of information you will get. This Millennium Star Atlas: An All-Sky Atlas Comprising One Million Stars to Visual Magnitude Eleven from the Hipparcos and Tycho Catalogues and Ten Thousand Nonstellar Objects without we comprehend teach the one who reading it become critical in pondering and analyzing. Don't be worry Millennium Star Atlas: An All-Sky Atlas Comprising One Million Stars to Visual Magnitude Eleven from the Hipparcos and Tycho Catalogues and Ten Thousand Nonstellar Objects can bring whenever you are and not make your case space or bookshelves' come to be full because you can have it in the lovely laptop even cell phone. This Millennium Star Atlas: An All-Sky Atlas Comprising One Million Stars to Visual Magnitude Eleven from the Hipparcos and Tycho Catalogues and Ten Thousand Nonstellar Objects having good arrangement in word and also layout, so you will not experience uninterested in reading.

Georgia Lopez:

Here thing why this specific Millennium Star Atlas: An All-Sky Atlas Comprising One Million Stars to Visual Magnitude Eleven from the Hipparcos and Tycho Catalogues and Ten Thousand Nonstellar Objects are different and reputable to be yours. First of all studying a book is good nevertheless it depends in the content of it which is the content is as tasty as food or not. Millennium Star Atlas: An All-Sky Atlas Comprising One Million Stars to Visual Magnitude Eleven from the Hipparcos and Tycho Catalogues and Ten Thousand Nonstellar Objects giving you information deeper including different ways, you can find any publication out there but there is no guide that similar with Millennium Star Atlas: An All-Sky Atlas Comprising One Million Stars to Visual Magnitude Eleven from the Hipparcos and Tycho Catalogues and Ten Thousand Nonstellar Objects. It gives you thrill reading through journey, its open up your own eyes about the thing that will happened in the world which is possibly can be happened around you. You can bring everywhere like in playground, café, or even in your means home by train. For anyone who is having difficulties in bringing the printed book maybe the form of Millennium Star Atlas: An All-Sky Atlas Comprising One Million Stars to Visual Magnitude Eleven from the Hipparcos and Tycho Catalogues and Ten Thousand Nonstellar Objects in e-book can be your choice.

Cheree Rodriquez:

Reading a book for being new life style in this season; every people loves to learn a book. When you learn a book you can get a lot of benefit. When you read publications, you can improve your knowledge, mainly because book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your analysis, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these us novel, comics, and also soon. The Millennium Star Atlas: An All-Sky Atlas Comprising One Million Stars to Visual Magnitude Eleven

from the Hipparcos and Tycho Catalogues and Ten Thousand Nonstellar Objects will give you new experience in reading through a book.

Donna Davis:

That publication can make you to feel relax. That book Millennium Star Atlas: An All-Sky Atlas Comprising One Million Stars to Visual Magnitude Eleven from the Hipparcos and Tycho Catalogues and Ten Thousand Nonstellar Objects was bright colored and of course has pictures on the website. As we know that book Millennium Star Atlas: An All-Sky Atlas Comprising One Million Stars to Visual Magnitude Eleven from the Hipparcos and Tycho Catalogues and Ten Thousand Nonstellar Objects has many kinds or variety. Start from kids until youngsters. For example Naruto or Investigation company Conan you can read and believe you are the character on there. So , not at all of book are generally make you bored, any it offers you feel happy, fun and relax. Try to choose the best book in your case and try to like reading that.
