Algorithmic Aspects of Wireless Sensor Networks: First International Workshop, ALGOSENSORS 2004, Turku, Finland, July 16, 2004, Proceedings (Lecture Notes in Computer Science)

This volume contains the contributed papers and invited talks presented at the 1st International Workshop on Algorithmic Aspects of Wireless Sensor Networks (ALGOSENSORS 2004), which was held July 16, 2004, in Turku, Finland, - located with the 31st International Colloquium on Automata, Languages, and Programming (ICALP 2004). Wireless ad hoc sensor networks have become a very important research subject due to their potential to provide diverse services in numerous applications. The realization of sensor networks requires intensive technical research and development efforts, especially in power-aware scalable wireless ad hoc communications protocols, due to their unusual application requirements and severe constraints. On the other hand, a solid theoretical background seems necessary for sensor networks to achieve their full potential. It is an algorithmic challenge to achieve efficient and robust realizations of such large, highly dynamic, complex, non-conventional networking environments. Features, including the huge number of sensor devices involved, the severe power, computational and memory limitations, their dense deployment and frequent failures, pose new design, analysis and implementation challenges. This event is intended to provide a forum for researchers and practitioners to present their contributions related to all aspects of wireless sensor networks. Topics of interest for ALGOSENSORS 2004 were: – Modeling of specific sensor networks. – Methods for ad hoc deployment. – Algorithms for sensor localization and tracking of mobile users. – Dynamic sensor networks. – Hierarchical clustering architectures. – Attribute-based named networks. – Routing: implosion issues and resource management. – Communication protocols. – Media access control in sensor networks. – Simulators for sensor networks.

From reader reviews:

Janet Magnuson:

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite guide and reading a guide. Beside you can solve your short lived problem; you can add your knowledge by the e-book entitled Algorithmic Aspects of Wireless Sensor Networks: First International Workshop, ALGOSENSORS 2004, Turku, Finland, July 16, 2004, Proceedings (Lecture Notes in Computer Science). Try to face the book Algorithmic Aspects of Wireless Sensor Networks: First International Workshop, ALGOSENSORS 2004, Turku, Finland, July 16, 2004, Proceedings (Lecture Notes in Computer Science) as your friend. It means that it can for being your friend when you sense alone and beside that course make you smarter than before. Yeah, it is very fortunated for you personally. The book makes you considerably more confidence because you can know almost everything by the book. So , let us make new experience as well as knowledge with this book.

Dustin Alvarez:

The reserve with title Algorithmic Aspects of Wireless Sensor Networks: First International Workshop, ALGOSENSORS 2004, Turku, Finland, July 16, 2004, Proceedings (Lecture Notes in Computer Science) possesses a lot of information that you can study it. You can get a lot of profit after read this book. That book exist new understanding the information that exist in this e-book represented the condition of the world today. That is important to yo7u to learn how the improvement of the world. This kind of book will bring you with new era of the globalization. You can read the e-book on your own smart phone, so you can read the item anywhere you want.

Amy Mueller:

People live in this new day of lifestyle always aim to and must have the free time or they will get great deal of stress from both everyday life and work. So , if we ask do people have time, we will say absolutely yes. People is human not really a robot. Then we question again, what kind of activity are you experiencing when the spare time coming to an individual of course your answer can unlimited right. Then do you try this one, reading guides. It can be your alternative with spending your spare time, the book you have read is usually Algorithmic Aspects of Wireless Sensor Networks: First International Workshop, ALGOSENSORS 2004, Turku, Finland, July 16, 2004, Proceedings (Lecture Notes in Computer Science).

Mary Young:

Do you really one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you find out the inside because don't assess book by its handle may doesn't work is difficult job because you are afraid that the inside maybe not as fantastic as in the outside look likes. Maybe you answer may be Algorithmic Aspects of Wireless Sensor Networks: First International Workshop,

ALGOSENSORS 2004, Turku, Finland, July 16, 2004, Proceedings (Lecture Notes in Computer Science) why because the excellent cover that make you consider about the content will not disappoint you actually. The inside or content is usually fantastic as the outside or perhaps cover. Your reading sixth sense will directly direct you to pick up this book.
