Crash Course in PC and Microcontroller Technology

Louis Frenzel

Crash Course in PC and Microcontroller Technology Louis Frenzel
Crash Course in PC and Microcontroller Technology teaches the basics of microprocessor architecture and applications in an easy-to-understand format. Each chapter includes learning objectives, clear explanations and examples, and an end-of-chapter self-quiz. The drill-and-review software included with the book allows learners to test themselves on the contents of each chapter, providing a second reinforcement of the material.

With the two other Crash Course books, Electronics Technology and Digital Technology, this book forms a complete course in electronics and microcomputer technology appropriate for technical schools, industrial training, and hobbyists.

Programmed instruction format for efficient and effective self study
Accompanying disk with self-test exams
Up-to-date coverage of PCs and embedded micros

From reader reviews:

Kenneth Hoy:

Information is provisions for anyone to get better life, information these days can get by anyone from everywhere. The information can be a understanding or any news even a concern. What people must be consider when those information which is from the former life are challenging to be find than now is taking seriously which one would work to believe or which one often the resource are convinced. If you have the unstable resource then you have it as your main information you will have huge disadvantage for you. All of those possibilities will not happen with you if you take Crash Course in PC and Microcontroller Technology as the daily resource information.

Patrick Allen:

Playing with family in the park, coming to see the sea world or hanging out with pals is thing that usually you will have done when you have spare time, subsequently why you don't try factor that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Crash Course in PC and Microcontroller Technology, it is possible to enjoy both. It is fine combination right, you still need to miss it? What kind of hangout type is it? Oh can occur its mind hangout people. What? Still don't have it, oh come on its named reading friends.

Charles Melendez:

Are you kind of busy person, only have 10 or even 15 minute in your time to upgrading your mind skill or thinking skill actually analytical thinking? Then you are receiving problem with the book compared to can satisfy your short period of time to read it because all of this time you only find book that need more time to be learn. Crash Course in PC and Microcontroller Technology can be your answer given it can be read by a person who have those short time problems.

Amy Osburn:

Don't be worry in case you are afraid that this book will certainly filled the space in your house, you may have it in e-book method, more simple and reachable. This Crash Course in PC and Microcontroller Technology can give you a lot of good friends because by you looking at this one book you have issue that they don't and make an individual more like an interesting person. This specific book can be one of one step for you to get success. This book offer you information that maybe your friend doesn't realize, by knowing more than additional make you to be great individuals. So , why hesitate? We need to have Crash Course in PC and Microcontroller Technology.
