Kristin Rauschenbach, Cesar Santivanez

Optical Fiber Telecommunications VIB: Chapter 16. Convergence of IP and Optical Networking (Optics and Photonics) Kristin Rauschenbach, Cesar Santivanez

Rapidly increasing network demand based on unpredictable services has driven research into methods to provide intelligent provisioning, efficient restoration and recovery from failures, and effective management schemes that reduce the amount of “hands-on” activity to plan and run the network. Integrating the service-oriented IP layer together with the efficient transport capabilities of the optical layer is a cornerstone of this research. Converged IP-optical networks are being demonstrated in large multi-carrier and multi-vendor venues. Research is continuing on making this convergence more efficient, flexible, and scalable. In this chapter, we review the current key technologies that contribute to the convergence of IP and optical networks, describing control and management plane technologies, techniques and standards in some detail. We also illustrate current research challenges, and discuss future directions for research.

From reader reviews:

Bill Flores:

This Optical Fiber Telecommunications VIB: Chapter 16. Convergence of IP and Optical Networking (Optics and Photonics) book is not really ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is actually information inside this reserve incredible fresh, you will get information which is getting deeper anyone read a lot of information you will get. That Optical Fiber Telecommunications VIB: Chapter 16. Convergence of IP and Optical Networking (Optics and Photonics) without we know teach the one who reading it become critical in pondering and analyzing. Don't become worry Optical Fiber Telecommunications VIB: Chapter 16. Convergence of IP and Optical Networking (Optics and Photonics) can bring any time you are and not make your handbag space or bookshelves' turn out to be full because you can have it in your lovely laptop even telephone. This Optical Fiber Telecommunications VIB: Chapter 16. Convergence of IP and Optical Networking (Optics and Photonics) having great arrangement in word and also layout, so you will not truly feel uninterested in reading.

Traci Daniels:

The feeling that you get from Optical Fiber Telecommunications VIB: Chapter 16. Convergence of IP and Optical Networking (Optics and Photonics) may be the more deep you looking the information that hide inside words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to comprehend but Optical Fiber Telecommunications VIB: Chapter 16. Convergence of IP and Optical Networking (Optics and Photonics) giving you excitement feeling of reading. The article author conveys their point in selected way that can be understood simply by anyone who read this because the author of this book is well-known enough. This book also makes your personal vocabulary increase well. It is therefore easy to understand then can go along, both in printed or e-book style are available. We highly recommend you for having this particular Optical Fiber Telecommunications VIB: Chapter 16. Convergence of IP and Optical Networking (Optics and Photonics) instantly.

Della Francis:

Reading a guide can be one of a lot of activity that everyone in the world really likes. Do you like reading book so. There are a lot of reasons why people like it. First reading a publication will give you a lot of new data. When you read a reserve you will get new information because book is one of various ways to share the information as well as their idea. Second, reading a book will make an individual more imaginative. When you reading through a book especially hype book the author will bring you to definitely imagine the story how the figures do it anything. Third, you are able to share your knowledge to other individuals. When you read this Optical Fiber Telecommunications VIB: Chapter 16. Convergence of IP and Optical Networking (Optics and Photonics), you may tells your family, friends and soon about yours guide. Your knowledge can inspire others, make them reading a publication.

Lee Villegas:

As a student exactly feel bored for you to reading. If their teacher inquired them to go to the library or even make summary for some guide, they are complained. Just very little students that has reading's spirit or real their hobby. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that examining is not important, boring as well as can't see colorful pics on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Optical Fiber Telecommunications VIB: Chapter 16. Convergence of IP and Optical Networking (Optics and Photonics) can make you experience more interested to read.
