Prospects for Biological Control of Plant Feeding Mites and Other Harmful Organisms (Progress in Biological Control)

Prospects for Biological Control of Plant Feeding Mites and Other Harmful Organisms (Progress in Biological Control)

The history of biological control of harmful organisms by mites is marked by outstanding achievements with a few premiere natural enemies. Early works concentrated on the use of predatory mites for the control of synanthropic flies. More recently, the focus has been mostly on mites of the family Phytoseiidae for the control of plant feeding mites. This is an important family of acarine predators of plant pest mites, which are effectively used in agriculture worldwide. Besides the vast knowledge in several species in this family, there are as well many opportunities for biological control, represented in an array of organisms and through the improvement of management techniques, which are constantly explored by researchers worldwide. This has resulted in an increasing interest in predatory mite species within the families Stigmaeidae, Ascidae, Laelapidae, Rhodacaroida, Macrochelidae, Erythraeidae and Cheyletidae, among others. This book will compile important developments with predatory mite species within these families, which are emerging as important tools for integrated pest management. New developments with predatory insects and pathogenic organisms attacking mites will also be a subject of this book. Finally, the potential and gaps in knowledge in biological control of acarine plant pests will be addressed.

From reader reviews:

Elizabeth Murphy:

Hey guys, do you desire to find a new book to see? Maybe the book with the name Prospects for Biological Control of Plant Feeding Mites and Other Harmful Organisms (Progress in Biological Control) suitable to you? Typically the book was written by a well-known writer in this era. Often the book entitled Prospects for Biological Control of Plant Feeding Mites and Other Harmful Organisms (Progress in Biological Control) is the one of several books that everyone reads now. This particular book was inspired by many men and women in the world. When you read this e-book you will enter the new way of measuring that you have never known before. The author explained their strategy in a simple way, consequently all of people can easily recognize the core of this publication. This book will give you a large amount of information about this world now. In order to see the representation of the world in this particular book.

Leslie Padilla:

Reading a publication tends to be a new life style within this era of globalization. With studying you can get a lot of information which will give you benefit in your life. Having a book everyone in this world can share their idea. Guides can also inspire a lot of people. A great deal of authors can inspire their particular reader with their story as well as their experience. Not only the story that is shared in the guides. But also they write about advantages about something that you need an instance. How to get a good score on toefl, or how to teach children, there are many kinds of books that you can get now. The authors in this world always try to improve their skill in writing, they also do some analysis before they write for their book. One of them is this Prospects for Biological Control of Plant Feeding Mites and Other Harmful Organisms (Progress in Biological Control).

Amanda Doss:

The book Prospects for Biological Control of Plant Feeding Mites and Other Harmful Organisms (Progress in Biological Control) has a lot of knowledge on it. So when you check out this book you can get a lot of profit. The book was authored by a very famous author. The writer makes some research before writing this book. This specific book is very easy to read you may get the point easily after perusing this book.

Irish Watts:

You may spend your free time to learn this book. This Prospects for Biological Control of Plant Feeding Mites and Other Harmful Organisms (Progress in Biological Control) is simple bringing you can read it in the area, in the beach, train in addition to soon. If you did not have much space to bring often the printed book, you can buy the particular e-book. It is made for you to read it quicker. You can save the particular book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.
