Thad Roberts

Einstein's Intuition: Visualizing Nature in Eleven Dimensions Thad Roberts

Presented in clear and accessible language with wonderfully supportive graphics, Roberts offers the reader a voyage through the development of human knowledge. He then examines the outstanding mysteries of modern physics—the phenomena that lie outside the borders of our current understanding (dark energy, dark matter, the Big Bang, wave-particle duality, quantum tunneling, state vector reduction, etc.) and suggests that the next step in our intellectual journey is to treat the vacuum of space as a superfluid—modeling it as being composed of interactive quanta, which, in a self similar way, are composed of subquanta, and so on. With this proposition Roberts engenders the vacuum with fractal geometry, and opens the door to explaining the outstanding mysteries of physics geometrically. Roberts' model, called quantum space theory, has been praised for how it offers an intuitively accessible picture of eleven-dimensions and for powerfully extending the insight of general relativity, eloquently translating the four forces into unique kinds of geometric distortions, while offering underlying deterministic dynamics that give rise to quantum mechanics. That remarkably simple picture explains the mysteries of modern physics in a way that is fully commensurate with Einstein's intuition. It is a refreshingly unique perspective that generates several testable predictions. "This work is mathematically beautiful and scientifically priceless, and the kicker is that it comes with a vivid and satisfying picture." ~ Chris J. Wilshaw "This book fundamentally changed my understanding of our universe." ~ Matt Emmi

From reader reviews:

Jeff Williams:

Do you one of people who can't read pleasurable if the sentence chained inside straightway, hold on guys this particular aren't like that. This Einstein's Intuition: Visualizing Nature in Eleven Dimensions book is readable simply by you who hate the straight word style. You will find the info here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to deliver to you. The writer of Einstein's Intuition: Visualizing Nature in Eleven Dimensions content conveys the idea easily to understand by many individuals. The printed and e-book are not different in the articles but it just different such as it. So , do you nonetheless thinking Einstein's Intuition: Visualizing Nature in Eleven Dimensions is not loveable to be your top checklist reading book?

Fabiola Gaylor:

Einstein's Intuition: Visualizing Nature in Eleven Dimensions can be one of your nice books that are good idea. We recommend that straight away because this guide has good vocabulary that can increase your knowledge in vocab, easy to understand, bit entertaining however delivering the information. The article author giving his/her effort to place every word into delight arrangement in writing Einstein's Intuition: Visualizing Nature in Eleven Dimensions but doesn't forget the main point, giving the reader the hottest in addition to based confirm resource details that maybe you can be considered one of it. This great information can certainly drawn you into brand-new stage of crucial thinking.

Karen Schanz:

As we know that book is significant thing to add our information for everything. By a publication we can know everything we would like. A book is a pair of written, printed, illustrated or maybe blank sheet. Every year seemed to be exactly added. This e-book Einstein's Intuition: Visualizing Nature in Eleven Dimensions was filled concerning science. Spend your free time to add your knowledge about your scientific research competence. Some people has distinct feel when they reading a new book. If you know how big selling point of a book, you can experience enjoy to read a publication. In the modern era like currently, many ways to get book that you simply wanted.

Elbert Lupton:

That publication can make you to feel relax. This specific book Einstein's Intuition: Visualizing Nature in Eleven Dimensions was multi-colored and of course has pictures on the website. As we know that book Einstein's Intuition: Visualizing Nature in Eleven Dimensions has many kinds or type. Start from kids until teens. For example Naruto or Private eye Conan you can read and think that you are the character on there. So , not at all of book are make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading that.
